INNOVAZIONE

Nel 2017 e nel 2018 Taxon ha introdotto due nuove macchine automatiche uniche nel mercato progettate in collaborazione con il produttore. L'introduzione di queste nuove macchine nelle linee di produzione riduce drasticamente il costo per pezzo prodotto anche al di sotto del competitor dell'estremo oriente, consentendo all'azienda di poter mantenere il ruolo di leader di mercato.

I prodotti Taxon sono frutto di un'importante ricerca e collaborazione con i propri partner, che si è basata su:

- identificazione e riconoscimento immediati dei prodotti da contrassegnare Taxon.
- innovazione produttiva e funzionalità del prodotto

La recente presentazione del carrello in plastica Qo-Kart è la prova concreta dell'applicazione dei principi Taxon ed è il punto di partenza per lo sviluppo di una completa linea di carrelli in plastica made in Italy.

QUALITÀ

Taxon utilizza sistemi interni di controllo e verifica della qualità del prodotto nelle sue fasi operative, in particolare per:

- certificazione fornitori e semilavorati
- verifica dei lotti con controlli a campione
- preparazione degli ordini

PRODUZIONE

Taxon produce nel magazzino di Borgo Fornari la maggior parte degli articoli a listino:

- Capacità produttiva: 1200 pezzi/ora
- Capacità di produzione mop di ricambio: 600 pezzi/ora
- Capacità di produzione mop per polvere: 2000 pezzi/giorno

Tutti gli articoli in alluminio sono prodotti interamente in Italia (manici, supporti per lavavetri, aste telescopiche), gli articoli in plastica sono prodotti da aziende partner, con stampi di proprietà e poi vengono assemblati nel magazzino in Borgo Fornari.

SEDE

Taxon si trova a Borgo Fornari, in prossimità dei caselli autostradali di Busalla e Ronco Scrivia. Dista 30 km dalla città di Genova, circa 100 km. dalla barriera di Milano Sud e circa 140 km da Torino.

La sede dell'azienda è costituita da due capannoni ubicati su terreno di proprietà di 6000 mq.

INNOVATION

In 2017 and in 2018 Taxon has introduced two new automatic machines unique in the market designed in collaboration with the producer which permit the highest number of pieces/hour for the production of mops and dust-mops. the introduction of these new machines in the production lines drastically reduces the cost per piece produced even below the competitor of the far east, allowing the company to be able to keep and regain large market slices.

Taxon products are fruit of an important research and collaboration with our partners and are finalized:

- immediate identification and recognition of products to mark Taxon.
- productive innovation and product functionality

The recent presentation of the plastic Qo-Kart trolley is the concrete proof of the application of Taxon principles and it is the starting point for the development of a complete line of plastic trolleys made in Italy.

QUALITY

Taxon uses internal quality systems of control and verific for minimize problems and mistakes in the different operative fasies, in particolare for:

- supplier certification and semilavorates
- production where every lot is subjected to a control as a sample
- order preparation.

PRODUCTION AREA

Taxon produces in the warehouse of Borgo Fornari the most part of the articles in the price list and for example

- Production capacity screw mops: 1200 pieces/hour
- Production capacity spare mops: 600 pieces/hour
- Production capacity dust mops: 2000 pieces/day

All aluminum items are produced entirely in Italy (handles, supports for window washer, telescopic poles). All plastic items are produced by patner companies, with moulds of property and then are assembled in the warehouse in Borgo Fornari.

HEADQUARTERS

Taxon is in Borgo Fornari , it is equidistant from the motorway toll booths of Busalla and Ronco Scrivia. It is 30 km away from the city of Genoa and about 100 km. from southern Milan barrier and about 140 km from Turin.

The company's headquarters consists of two sheds located on 6000 square meter owned land.

- A

Rappresenta il nome indicato dall'azienda per definire il prodotto in vendita: al fine di ridurre il più possibile il rischio di errore, vi invitiamo nel trasmettere un ordine, ad inserire anche la dicitura completa.
- B

È il codice di gestione aziendale del prodotto, che dovete usare quando volete trasmettere un'ordine.
- C

I prodotti Taxon che contengono questa indicazione possono subire durante la loro vita operativa alcuni lavaggi per l'eliminazione dello sporco accumulato e per renderli nuovamente idonei all'attività preposta: la temperatura consigliata è la massima sostenibile dal prodotto in oggetto; superandola si compromettono le caratteristiche tecniche e di durata del prodotto stesso.
- D

Rappresenta il peso standard (in altri casi ad esempio le frange, è indicata la lunghezza standard, o nel caso dei carrelli le dimensioni standard) del prodotto in vendita; la tolleranza ammessa in produzione è di + / - 5% del peso standard.
- E

I colori: ogni prodotto che contiene questi simboli può essere venduto nei colori indicati; nel caso in oggetto se vogliamo comprare il mop cotone extra da gr. 280 con il rocchetto verde dobbiamo indicare il seguente codice: 104 02.V .
- F

La confezione: ogni nostro prodotto è venduto all'interno di imballi in cartone assolutamente gratuito per il cliente e garanzia di corretta conservazione e qualità ; il numero indicato indica la quantità di pezzi singoli contenuti nella confezione standard .
- G

Prezzo: il prezzo indicato nel nostro listino è sempre in € ed è il prezzo di mercato che Taxon consiglia per la vendita del prodotto all'utilizzatore finale.
Nel nostro listino il prezzo si intende sempre per singolo pezzo.
- A

Is the name given by the company to define the product for sale: in order to reduce as much as possible the risk of error ,we invite you to send an order with all the word's description.
- B

Is the code of business management product, which you have to use when you palce an order.
- C

Taxon products containing such information are subject to during their working life for a few washes to remove the dirt and built up again to make them fit for the authority : the recommended temperature is the maximum sustainable investment product, surpassing its features are compromised technical and life of the product itself.
- D

Is the standard weight (in other cases, such as dust-mops, shows the standard lenght, or in the case of trolleys the standard size) of the product sale, the tolerance allowed in production is + / - 5% of standard weight.
- E

Colors: any products that contains these symbols can be sold in the colors shown, in this case if you want to buy extra cotton mop gr.280 with a green spool you have to use the following code: 104 02.V .
- F

The package: our product is sold in cardboard packaging absolutely free for the customer and ensuring proper storage and quality, the following number indicates the amount of individual items contained in the standard package.
- G

Price: the price shown on our list is always on € and is the market price Taxon recommended for selling the product to the end user.
In our list, price is considered at each piece.
